

# Training on Measurement & Calibration

**ENSURE ACCURACY. MAINTAIN  
COMPLIANCE. IMPROVE QUALITY**

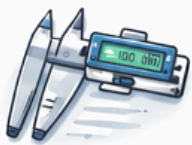

## Training Overview

Accurate measurement is the foundation of quality, safety, and regulatory compliance. This comprehensive training equips participants with the knowledge and practical skills to manage, perform, and control measurement and calibration activities effectively.

## Target Audience

- ✓ Laboratory Technicians
- ✓ QA/QC Engineers
- ✓ Production Supervisors
- ✓ Maintenance Engineers
- ✓ Metrology Personnel
- ✓ Anyone responsible for measurement systems and calibration control

## Course Content

Fundamentals of Measurement

Calibration Principles

Measurement Uncertainty

Standards & Compliance

Calibration Management System

Practical Sessions

## Key Takeaways

By the end of this training, participants will be able to:

- Understand measurement principles and metrology fundamentals
- Interpret calibration certificates correctly
- Manage calibration systems in compliance with standards
- Evaluate measurement uncertainty
- Ensure traceability to national/international standards
- Identify and control measurement errors

**2-DAY INTENSIVE PROGRAM**
